**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 5 and 11 – 14, drawn to steps of organizing and interrelating data or files including a hierarchical structure, classified in class 707, subclass 100.
  - II. Claims 6 and 15, drawn to query formulation, input preparation or translation, classified in class 707, subclass 4.
  - III. Claims 7 – 10 and 16 – 20, drawn to pattern matching or comparing data files, classified in class 707, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions as listed in groups I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Groups I, II and III has separate utility as follows:

Group I: To describe attributes by selecting from a hierarchical structure and arranging the numeric code for each attribute selected by the user in an attribute profile.

Group II: To enable the searcher to select and specify the importance of each attribute and recording the numeric code and associated importance for each attribute selected by the searcher, building a requirements profile.

Group III: A data query engine to compare the requirements profile against the attributes profiles and to provide a list of candidates that have attributes that relate to the requirements.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III, the search required for Group II is not required for Group I and Group III, and the search required for Group III is not required for Group I and Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

See MPEP § 806.05(d).
